

# PSOR comb

## The effective scalp therapy

The PSOR comb offers an effective therapy of psoriasis on the hairy scalp.

---

## Treatment

For the treatment of the scalp and small skin areas e.g. armpits, fingernails, skin wrinkles and Genital area.

---

The light source is arranged between the individual comb rows in such a way that the UV energy can act directly on the lesions and the therapeutically important UV components reach the skin.

---

Low weight and short treatment times make a pleasant therapy possible.

---

The detachable attachment enables a quick and easy cleaning.

---

The extremely light device makes treatments particularly pleasant. The simple handling and the excellent success rate make the PSOR comb the device of the first choice in home therapy.

---

The PSOR comb is equipped with an aid number and the purchase is often covered by the health insurance. Therefore, it is often the first choice device for home therapy.

---

The operation is particularly uncomplicated and the device is easy to clean. The comb is therefore perfectly suited as a home therapy device.

---

Each PSOR comb is checked by hand in order to obtain an uncompromising quality standard.

---

The treatment is particularly safe and reliable. This is important for pregnant women, children, elderly people and immunocompromised patients.
